

RND Peak Performance Maintenance Agreement

Thank you for choosing RND Automation for your custom robotic, assembly or packaging machinery. We are happy to offer you on-site technical assistance to maintain your machinery at Peak Performance.

We are dedicated to helping our customers maximize uptime by keeping your machine up to date with preventative maintenance and identifying areas of concern before downtime occurs. Our foremost concern is keeping your asset producing.

Our Maintenance Agreements are a convenient way to keep your equipment running efficiently. With regular maintenance, downtimes are minimized, optimal performance is achieved, and you will realize an extended life expectancy of your machinery.

What to expect when RND provides service under one of our maintenance agreements:

- Thorough inspection of the interior and exterior of machine
- Optimize system to “original as shipped” speed and efficiency
- Inspection of all electrical connectors, motors, and drive systems
- Train operators and maintenance personnel on processes. Can be customized to your individual plant’s structure and need
- Secure all electrical connections in the main enclosure
- Replacement of worn parts as well as a recommendation of future maintenance¹
- Correction, if needed, of system variables
- Lubrication at critical points in the equipment
- Present a report of the machinery after the service is completed w/ recommendations

Maintenance Agreement Options²

For customers outside of Florida, agreements do not include travel expenses. These will be invoiced at our cost + 15%. If the customer is in Florida, agreements include travel arrangements except for lodging (if required)

Annual - 1 day per year: \$2,000 (\$250 savings off daily rate)

Semi Annual - 2 days per year: \$3,750 (\$750 savings off daily rate)

Quarterly - 4 days per year: \$6,250 (\$2750 savings off daily rate)

Please call 941-870-5400 or email service@rndautomation.com with questions and to register your machines for a Peak Performance Maintenance Agreement.

¹ Cost of replacement parts are not included in the agreement. Parts can be replaced from customer’s spare parts inventory or a report can be provided listing necessary parts and work to be performed by the customer’s maintenance staff.

² When purchased with your machine. Purchasing 1 year or more after shipment of machinery adds a onetime onsite machine assessment of charge of \$2250.
